Remote Help

Windows

- Disable chat at the tenant level
- Show reasons for non-compliance prior to accessing device
- Annotation tool enhancement and laser pointer
- Intune audit logs that show who helped whom and can be exported
- Full threaded chat experience
- Conditional access (e.g., MFA)
- **Switch from view-only to full control during session**
- ARM64, Windows 365 support
- Launch a session seamlessly from Intune

macOS

- **Full control support**
- Threaded chat and Intune audit logs
- Conditional access
- Session reporting history

Android

- Attended/Unattended
- Session reporting history
- Intune audit log

The screenshot shows a Windows 11 desktop with a blue abstract background. A File Explorer window titled 'Downloads' is open, displaying a 'Finance app installer' file. Overlaid on this is a Windows Security dialog box titled 'Endpoint Privilege Management' from 'CONTOSO'. The dialog asks 'Open this app as administrator?' for the 'Finance app installer'. It includes a text box for 'Enter business justification' with the text 'To do computational forward looking finance projections'. Below the text box, it states 'You'll have administrator access to this app.' and 'This information will be sent to your organization's IT admin. Privacy info'. At the bottom are 'Cancel' and 'Continue' buttons. The taskbar at the bottom shows the Start button, Search, and several pinned apps. The system tray on the right shows the date and time as 10:16 AM on 3/26/2023.

Endpoint Privilege Management

- Automatic, user-confirmed or support-approved elevation
- Insights based on elevation audits
- Effective control of child processes
- Rules based on organizational requirements
- Easy addition or removal of rules
- Tenant level enablement, per device rollout

Contoso Issuing CA

Issuing certification authority

Monitor

Properties

ⓘ You can't edit a certificate authority (CA) once it's created.

Basics

Name	Contoso Issuing CA
Description	Using Microsoft Cloud PKI - Contoso Corp Issuing CA in the cloud
Status	✓ Active

Settings

CA type	Issuing CA
Root CA	Contoso Corp Root CA
Validity period	10 years
Expiration	11/14/2033, 17:28:03 UTC
Common name (CN)	Contoso corp Issuing CA
Organization (O)	Contoso corporation
Organizational unit (OU)	IT
Country (C)	United States
State or province (ST)	New York
Locality (L)	NY
Key size and algorithm	RSA-4096 and SHA-512
CRL distribution point	http://257fa3858b449305802267432800centraluseuap.pki.azure.net/certificateAuthorities/6ee4554c-a91c-42d3-9768-242705633f86_v1/current.crl
SCEP URI	https://fef.dmsua011nucgslg304v2013Rtcmf504UPki/CloudPkiFEService/Scep/3074672862b14900500801714e0000065a19940f5c8401b6-b9a5-b4b1a9098f86

Cloud PKI

Create certification authorities per Intune tenant

- Create 2-tier PKI hierarchy
 - Root, issuing CA in the cloud
- Support Bring Your Own CA (BYOCA)
 - Anchor Intune issuing CA to a private CA
- Signing and encryption algorithms | RSA
 - RSA Key sizes – 2048, 3072, 4096
- Hash algorithms – SHA-256, SHA-384, SHA-512
- Providing a Cloud Certificate Registration Authority (SCEP) service per issuing CA
- CRL distribution points

End-entity (leaf) certificate issuance

- Protocol/Cert format – SCEP (PKCS#7)
- Platforms: Intune-enrolled devices on iOS, Android, Mac, and Windows

Certificate life cycle management

- Automatic and manual certificate revocation

Reporting/Dashboard

- Issuing CA summary (issued, expired, revoked) and detailed information about issued certificates

Audit

- Admin actions performed on the CA (i.e., create, disable, delete, renew, revoke)

RBAC permissions and scope tags

Advanced Endpoint Analytics

- Identify anomalies based on patterns of unexpected events and signals aggregated across enrolled devices.
- Discover meaningful patterns and trends by correlating anomalies to device configurations and properties like OS version and app/driver versions.
- Use an enhanced device timeline view that includes anomalies to ease and speed troubleshooting.
- Get detailed report of the analytics, insights, and recommendations for a subset of devices using IT-defined scope tag.
- Device inventory querying for near real-time assessment of the state of devices and taking action.
- Battery health insights to support sustainability goals while enabling remote work, device longevity, and improved hardware purchase decisions.
